### Tarea 4 2012

Problema 1-d Probar la correctitud.

```
\begin{split} \{N>0\} \\ pal, k &:= true, 0 \\ \{inv: pal \equiv (\forall i | 0 \leq i < k : S[i] = S[N-i-1]) \land 0 \leq k \leq N \} \{cota : N-k\} \\ do\ (k \neq N) \land pal \rightarrow \\ pal, k &:= S[k] = S[N-k-1], k+1 \\ od \\ \{pal \equiv (\forall i | 0 \leq i < N : S[i] = S[N-i-1]) \} \end{split}
```

#### Demostración

**Prueba 1.a:** 
$$\{P \land B0\}S0\{P\}$$

$$\begin{aligned} \{pal &\equiv (\forall i | 0 \leq i < k : S[i] = S[N-i-1]) \land 0 \leq k \leq N \land (k \neq N \land pal)\} \\ &pal, k := (S[k] = S[n-k-1]), k+1 \\ \{pal &\equiv (\forall i | 0 \leq i < k : S[i] = S[N-i-1])\} \land 0 \leq k \leq N \end{aligned}$$

Por regla de la asignación:

$$pal \equiv (\forall i | 0 \le i < k : S[i] = S[N - i - 1]) \land 0 \le k \le N \land (k \ne N \land pal) \Rightarrow$$
$$(pal \equiv (\forall i | 0 \le i < k : S[i] = S[N - i - 1]) \land 0 \le k \le N)(pal, k := (S[k] = S[n - k - 1]), k + 1)$$

Suposicion del antecedente, empezando con el consecuente para llegar a true:

$$(pal \equiv (\forall i | 0 \leq i < k : S[i] = S[N-i-1]) \land 0 \leq k \leq N)(pal, k := (S[k] = S[n-k-1]), k+1)$$

 $\equiv \langle Sustitucion\ textual \rangle$ 

$$S[k] = S[n-k-1] \equiv (\forall i | 0 \le i < k+1 : S[i] = S[N-i-1]) \land 0 \le k+1 \le N$$

 $\equiv \langle Extrayendo\ ultimo\ elemento\ cuantificador \rangle$ 

$$S[k] = S[n-k-1] \equiv (\forall i | 0 \le i < k : S[i] = S[N-i-1]) \land S[k] = S[N-k-1] \land 0 \le k+1 \le N$$

$$\equiv \langle p \land (p \equiv q) \equiv p \land q \rangle$$

$$S[k] = S[n-k-1] \wedge (\forall i | 0 \leq i < k : S[i] = S[N-i-1]) \wedge S[k] = S[N-k-1] \wedge 0 \leq k+1 \leq N$$

$$\Rightarrow \langle p \land q \Rightarrow p \rangle$$

$$(\forall i | 0 \le i < k : S[i] = S[N - i - 1])$$

$$\equiv \quad \langle Hipotesis: \ pal \equiv (\forall i | 0 \leq i < k : S[i] = S[N-i-1]) \equiv true \rangle$$
 
$$true$$

Prueba 2: 
$$P \land \neg B0 \Rightarrow Q$$

$$pal \equiv (\forall i | 0 \leq i < k : S[i] = S[N-i-1]) \land 0 \leq k \leq N \land (k=N \lor \neg pal) \Rightarrow pal \equiv (\forall i | 0 \leq i < N : S[i] = S[N-i-1])$$

Suposición del antecedente:

$$H0: pal \equiv (\forall i | 0 \leq i < k: S[i] = S[N-i-1]) \equiv true$$

 $H1: 0 \leq k \leq N \equiv true$ 

 $H2: (k = N \lor \neg pal) \equiv true$ 

$$true$$

$$\equiv \langle H2 \rangle$$

$$k = N \lor \neg pal$$

Por casos:

$$k = N$$

$$\equiv \langle H0 \rangle$$

$$k = N \land pal \equiv (\forall i | 0 \le i < k : S[i] = S[N - i - 1])$$

$$\equiv \langle Sustitucion \ k = N \rangle$$

$$k = N \land pal \equiv (\forall i | 0 \le i < N : S[i] = S[N - i - 1])$$

$$\Rightarrow \langle p \land q \Rightarrow p \rangle$$

$$pal \equiv (\forall i | 0 \le i < N : S[i] = S[N - i - 1])$$

$$\therefore H0 \land H1 \land H2 \Rightarrow pal \equiv (\forall i | 0 \le i < N : S[i] = S[N-i-1])$$

Por Sup. Antecedente + Caso: k = N

$$\neg pal$$

$$\equiv \langle H0 \rangle$$

$$\neg true$$

$$\equiv \langle \neg true \equiv false \rangle$$

$$false$$

$$\equiv \langle false \Rightarrow p \rangle$$

$$pal \equiv (\forall i | 0 \le i < N : S[i] = S[N - i - 1])$$

$$\therefore \ H0 \land H1 \land H2 \Rightarrow pal \equiv (\forall i | 0 \le i < N : S[i] = S[N-i-1])$$

Por Sup. Antecedente + Caso:  $\neg pal$ 

$$\therefore \ H0 \land H1 \land H2 \Rightarrow pal \equiv (\forall i | 0 \le i < N : S[i] = S[N-i-1])$$

Por Sup. Antecedente

#### Tarea 5 2012

**Problema 3-d** Calcular el índice académico de un trimestre. Suponga que en un arreglo de enteros de tamaño N se almacena la nota obtenida en cada materia y en otro arreglo se almacena el número de créditos correspondientes a esas materia. N representa el número de materias inscritas en el trimestre.

```
const\ n, c : seq\ of\ int;
                              const\ N: int := |n|;
                              const\ M: int := |c|;
                              var\ i, sc: int;
                              var\ ia: float;
                              \{N > 0 \land M > 0 \land N = M\}
                              sc, i, ia := 0, 0, 0
                              \{inv: sc = (\sum k|0 \leq k < i: c[k]) \land ia = (\sum k|0 \leq k < i: n[k]*c[k]) \land 0 \leq i \leq M \land 0 \leq i \leq N \land N = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i) \land ia = (\sum k|0 \leq k \leq i)
M{Cota: N-i}
                              do \ i < N \rightarrow
                                          sc, i, ia := c[i] + sc, i + 1, ia + n[i] * c[i]
                              od
                              \{wp.(ia := ia/sc).Q\}
                              ia := ia/sc
                              \{sc = (\sum k | 0 \le k < M : c[k]) \land ia = (\sum k | 0 \le k < N : n[k] * c[k])/sc)\}
                 Hallar la precondición más débil de la asignación wp.(ia := ia/sc).Q.
                                          (sc = (\sum k | 0 \le k < M : c[k]) \land ia = (\sum k | 0 \le k < N : n[k] * c[k])/sc)(ia := ia/sc)
                                                       \langle Sustitucion\ textual \rangle
                                          sc = (\sum k | 0 \le k < M : c[k]) \land ia/sc = (\sum k | 0 \le k < N : n[k] * c[k])/sc
                                                       \langle Aritemetica \rangle
                  \equiv
                                          sc = (\sum k | 0 \le k < M : c[k]) \land ia = (\sum k | 0 \le k < N : n[k] * c[k])
```

Dado que la precondición más débil asegura correctitud, ya se tiene probada esta parte.

#### Prueba 0

$$\{N > 0 \land M > 0 \land N = M\}$$
 
$$sc, i, ia := 0, 0, 0$$
